Packaging is a vital process that plays a major role in the quality of logistics services — affecting everything from size and weight to transport costs and lead time.

That's why SANRITSU puts its packaging business, driven by sophisticated technologies, at the heart of everything it does. Whether it's our warehousing services, which are backed by conveniently located, fully-featured facilities and equipment, or our transport services, in which we pride ourselves on exceptional speed and safety, we offer premium, total logistics solutions that stretch across Japan and around the globe.

We will continue to meet our customers' true needs head-on, challenging ourselves to offer logistics services with value that exceeds expectations.

Packaging Services

Our original design and professional packaging provides the ideal solutions to customer needs.

Packaging solutions of all shapes and sizes

Steel packaging

Wooden boxes (lumber/plywood)

• Skids (bottom portion) are sixteen times stronger than wood • Cost can be lower than wooden or heat treatment boxes by reducing volume • Can be used with a barrier to keep out moisture and humidity

Wooden boxes (lumber/cardboard)

 Reduced weight ideal for land/air transport • Cardboard hides package contents

transport costs •Eliminates the need for fumigation or heat treatment

From order to delivery

We design custom packaging shapes and specifications to match the shape and special characteristics of individual products so that our customers get exactly what they need.

Specification meeting

Quote/drawing/ spec sheet preparation

Awards

World Star award/ Technical Packaging Award/METI Environmental Bureau Director-General's Award/ Large and Heavy Packaging Division Award/ Logistics Award, and more

• Can be made from 100% plywood, eliminating the need for fumigation

Reinforced cardboard boxes

• Lightweight packaging reduces air

• Lightweight solution-ideal for land/air transport • Can be more cost effective than wooden boxes

<One of our customer solutions>

• Winner of the 2021 World Star award

Aluminum wheel packing box to shorten paint drying time Makes it possible to pack and ship without waiting for paint to dry, contributing to shorter lead time Makes it possible to change specifications to packing methods that use corner fixed materials and spacers, thereby reducing cushioning materials and spacers

Warehousing Services

Sophisticated warehouses that meet a variety of needs, developed with customer convenience in mind every step of the way.

Global Logistics

Message from the president

We at SANRITSU have been packaging experts since our company was founded seventy years ago — which means that we are in the business of protecting our customers' treasure.

We've kept our commitment to keep valuable items safe even as we've expanded into more business areas, working to provide a variety of customer-focused services day after day.

Our global economy is undergoing drastic change even as customer needs diversify and business becomes more international in scope. Navigating these shifts requires that we become even more diverse and specialized in the kinds of logistics services that we provide. We will continue to build on our sophisticated packaging technologies as we branch out to deliver end-to-end support in all of our land, marine, and air logistics services — whether domestic or international — that meet our customers' high expectations. We will also continue to keep an open dialogue with our clients about ways we can make our logistics services even more efficient, actively seeking out what customers truly need and coming up with the solutions that move their businesses forward. In the process, we will strive to both earn our customers' trustand do our part to make the world a better place.

We strive to be a company that is attractive not only by fulfilling our corporate social responsibilities, but by aiming to provide kind and compassionate logistics services that take the environment into account as well. We are working day in and day out to fulfill our role as logistics professionals with extensive knowledge of our customers and a variety of other industries so that we may be the logistics partner of choice for our clients.

President and Representative Director Yasuhide Miura

Company Overview

Company Name SANRITSU CORPORATION

Our Management Philosophy

Achieving higher-quality operations is at the heart of everything we do as we strive to create a more prosperous world by respecting our customers' wishes and continuing to provide them with the premium logistics services.

We want SANRITSU to be known as an attractive company.

Our Vision

From operations to solutions

Basic Sustainability Policy

With the corporate philosophy of "Aiming to Become a Beautiful, Appealing Company" in mind, the Sanritsu Group will sincerely execute business activities to contribute to the sustainable growth of society.

- We strengthen our corporate governance to "improve management quality."
- We create new value as a provider of logistics solutions.
- **3** We promote diversity and inclusion in respect for the human rights of all people.
- We realize a safe, secure, and decent work environment.
- We ensure active communication with stakeholders including customers, employees, shareholders, and local communities to "improve our logistics quality."

Our Commitment to Quality

Every one of our employees strives daily to eliminate accidents and improve the quality of their work, engaging each task with purpose and constantly endeavoring to improve quality while increasing their awareness to maintain a zero-accident record. Quality management teams throughout the company also gather regularly to carry out activities designed to achieve even better logistics quality.

Environmental Initiatives

Our efforts to conserve the environment and reduce costs through our logistics activities include reorganizing warehouse layouts to improve work processes and reduce energy usage by boosting efficiency and actively working to reuse wood, cardboard, and other materials.
